

Baumit Renovation Systems

**The Easy Way
to Renovate
your Façade**

Ideas with a future.

Beautiful and individual façades to last a lifetime

From Old to New

A façade is not just a means of decoration, but is also a protective shield for every building. As such, it is exposed to many different environmental stresses on a daily basis, which can leave their mark over time. From sun-induced colour fading to deep cracks and algae or mould infestations, there are many different factors that can rob a façade of its initial shine and prevent it from functioning properly.

Whatever the reason, Baumit has the right system solution for every renovation. Starting with professional substrate preparation right through to the final coat of Baumit façade paints or render.

It's all about the base

In order to ensure that the topcoat adheres securely, the substrate must be sufficiently sound, dry, stable and free of dust and frost. The substrate must therefore be assessed before the start of the painting work and any necessary substrate preparation must be carried out to bring it up to the required standard.

Baumit MultiPrimer, water-vapour-permeable primer for stabilising mineral and organic surfaces. Remove algae and mould with **Baumit FungoFluid**. **Baumit ReClean**, a concentrated biodegradable cleaning agent with strong cleaning and grease removal power for all renders. **Baumit ReCompact** primer for stabilising sandy, powdery mineral plasters.

Baumit FlexaColor

- High coverage
- Crack-bridging
- Highly flexible

Silicon resin reinforced, flexible façade paint, with excellent coverage. Suitable for covering cracks up to 0.5mm, without the requirement for filling.

Baumit PremiumPrimer

- Reduces absorption
- Optimum topcoat application
- For a superior quality finish

Universal substrate primer. Use to prepare a surface prior to applying render or paint to reduce absorption and for better application. The primer ensures excellent application and texture of the final topcoat.

Baumit MultiContact MC55W

- Universal topcoat
- Strong bond
- For all mineral substrates

Natural-white, fibre-reinforced multi-purpose bonding mortar. A universal topcoat, also suitable as a remediating plaster, adhesive and basecoat. For all mineral substrates.

NO CRACKS

- Quick
- Easy
- Beautiful

Refresh the façade

Give your house a quick and easy facelift with a fresh coat of paint. Baumit premium products are easy and quick to apply with a perfect constant texture. Premium colours offer protection against organic contaminants, provide active self-cleaning of the surface and keep the colour of the façade long-lasting, beautiful and vibrant.

CRACKS < 0.5 mm

- Filling
- Quick & easy
- Shining new

Cracks smaller than 0.5mm Visual renovation

Over time hairline cracks can appear in the facade that can allow water to penetrate, which can then freeze in the winter, resulting in far greater damage.

Cracks smaller than 0.5 mm can be simply filled with **Baumit FlexaColor** and finished with two coats of one of Baumit's high-quality façade paints. We recommend the self-cleaning **Baumit NanoporColor** or the water resistant **Baumit StarTop** silicone resin render for increased protection against algae and mould.

CRACKS > 0.5 mm

Without render:

- Fast
- Flexible
- Durable

Cracks greater than 0.5mm Standard renovation

For larger cracks that are clearly visible to the naked eye, immediate action is required, as the larger the crack, the more water can penetrate and cause long-term damage to the structure.

Baumit's MultiContact MC55, thanks to its innovative formula, is water-repellent and flexible, making it the ideal reinforcing mortar. Use with Baumit StarTex textile-glass mesh. You can texture Baumit MultiContact like a conventional render and then add the finishing touch to your façade with one of Baumit's high-quality paints.

With render:

- Strong
- Extremely long-lasting
- Premium Solution

Cracks greater than 0.5mm Premium renovation

This premium solution is a high-class renovation solution that provides lasting protection against the most common mechanical and environmental influences. Giving you the best result for your façade so that you won't have to worry about fading, dirt or cracks again for many years to come.

Reinforce your façade with **Baumit MultiContact MC55** or **Baumit StarContact White** and **Baumit StarTex** mesh.

For a topcoat, instead of a Baumit colour façade paint, you can then apply one of the high-quality exterior renders, such as **Baumit NanoporTop** or **Baumit SilikonTop**.
