

*Quality application for an unrivaled finish*

*Baumit UniRend™*  
**Render solution  
for new builds**

# Baumit UniRend™ Solution for new builds

- Flexible render system
- Cost effective
- Alternative to sand and cement or monocouche

The core of the system is a pre-blended, factory mixed lime-cement basecoat, Baumit KZP 65. Optimised for elasticity, KZP 65 provides a solid base that absorbs any stresses that might affect the substrate.

The system is finished with a silicone based thin coat final layer alleviating the common problem of cracking for a long lasting finish.

From small to large-scale new build projects, the UniRend™ System provides a cost-effective alternative to sand and cement or traditional render options such as monocouche.

The UniRend™ system consists of a combination of versatile products that work together to ensure a strong and robust building.

### BENEFITS

**Strength**  
To minimise cracking, the UniRend™ system components work together in layers for resilience and robustness.

**Versatility**  
Suitable for use on new block work, bricks and clay block substrates.

**Flexibility**  
Reinforced lime-cement helps to minimise settlement cracks meaning less call backs.

**Durability**  
Weather and frost resistance means UniRend™ can hold its own against the elements.

**Breathability**  
Allows buildings to release moisture efficiently allowing the building to breathe.\*

**Longevity**  
Colour pigments stay bright with less on-going maintenance and cleaning required.

**Usability**  
No pre-treatment needed for most substrates means easy application either by machine or hand.

**Creativity**  
800+ colours and design options for the perfect finish.

\*When used with SilikonTop or StarTop as a top coat.

### SYSTEM BUILD UP

- 1 **Baumit Tops**  
Finish with a ready-to-use, weather resistant top coat render 
- 2 **Baumit UniPrimer**  
Ready-to-use, all purpose primer 
- 3 **Baumit StarTex\*\***  
High performance reinforcing mesh 
- 4 **KZP 65**  
Versatile mineral lime cement render 

\*\* Mesh reinforcement is compulsory at stress points and optional throughout the rest of the system.
